

AUSTRALIAN FIRE CONTROL CAPABILITY STATEMENT

Australian Fire Control Pty Ltd are a specialist contractor in the area of FIRE & SMOKE RATED BUILDING PRODUCTS & SERVICES.

AFC's experience dates back to 1979 and ensures the necessary expertise to meet the demands of this high performance industry.

This expertise is being applied throughout Australia and SE Asia, where AFC are developing a reputation as the 'go to' company amongst Builders, Engineers, Designers and Architects for major projects within the general construction, mining and oil & gas industries.

AFC's products are either supplied by world class manufacturers or manufactured under licence by AFC.

All products are supported by full scale testing and assessments conducted globally and valid locally.

In-house technical capacity enables AFC to work with other industry professionals in providing solutions to the many complex scenarios that arise from application of the prescriptive BCA/NCC.

You could say we go where others fear to tread and our clients are very appreciative of this work ethic.

Supporting this technical capacity is an infrastructure that has been assembled over many years. Highly qualified tradesmen with experienced supervisors & estimators mesh seamlessly with thoughtful management and top level administrative staff to provide a strong and vibrant business.

Windows, Doors & Barriers

Quality Management

Australian Fire Control has a comprehensive quality control programme which focuses on continuous improvement and the pursuit of the highest level of customer service.

The programme includes a pre-manufacturing review process to identify and address any design aspects which pose a potential quality risk as well as regular quality audits for all components throughout.

This process is designed to ensure minimal quality issues at completion however our well defined and systematic approach to identifying and rectifying these issues ensuring our clients remain well informed and with an end product of superior quality in accordance with tested systems.

"A team of skilled and capable people."

A well managed company with a strong background

Australian Fire Control is recognised as one of Western Australia's largest and most respected fire protection companies enjoying excellent working relationships with all industry stakeholders including trade unions, suppliers, the media, regulators, subcontractors and industry organisations.

Australian Fire Control has worked with all major forms of construction contracts and delivery methods and has an impeccable reputation for honesty, integrity and fair dealing.

Our superior service is built on well-respected administrative and on-site staff, many of whom have been with the company for most of their working lives.

Pre-Qualifications & Certification

We have put in place support systems that include:

- > Certification to AS/NZS ISO9001:2000 for Quality Management Systems;
- > Safety management systems certified to AS/NZS ISO4801:2001;
- > Environmental Management Systems AS/NZS ISO14001:2004.;

Our experience and expertise is extremely diverse allowing us to operate successfully in markets extending across minor maintenance and facilities management, tunnels, mining, detached housing and major construction.

"The directors and staff have a comprehensive understanding of Western Australia's regulatory requirements with a distinctive approach to design and construction. This convergence of innovation and skill from concept to reality is a AFC hallmark"

Our Clients

Client testimonial's

"I would like to take this opportunity to congratulate and thank Australian Fire Control for the outstanding results achieved on the Ritz Carlton project under what proved to be exceptionally difficult circumstances. The "end product" has exceeded all expectations."

“You could say we go where others fear to tread and our clients are very appreciative of this work ethic.”

Environmental Policy

AFC operates its Environmental Management Systems (EMS) in-line with ISO 14001:2015.

We continually evaluate our activities to ensure they are in-line with AFC's EMS Policy and are working to reduce our environmental impact.

AFC's EMS Policy is empowered by all staff and is endorsed by the Board of Directors ensuring that EMS is maintained and is present in everything we do.

All AFC's employees and sub-contractors are educated on our EMS policy ensuring that all are aware of the importance of their compliance and the individual's responsibility in conforming to the policy.

Safety Policy

AFC is committed to Health, Safety and the Environment (HSE), providing a safe and healthy workplace for all of our workers.

We recognise our responsibility to provide a safe and healthy working environment for all contractors, clients, visitors and the public, developing 'Safe Work Method Statements' for each project.

The HSE policy is relevant in everything AFC does, taking a systematic approach to identifying, assessing and controlling all health and safety risks and hazards.

Management have direct involvement and are committed to the 'commit-plan-do-check-review' method, ensuring policies are developed to ensure all operations conducted by employees and contractors are in accordance with relevant legislation, regulatory requirements and industry standards.

What differentiates us from the competition?

- Client Motivated
- Solution Focussed
- Reliable
- Flexible and Robust
- Efficient and Effective

"We have trusting relationships with our clients,
built on respect and our capability"

Sydney Metro: Australia's Biggest Public Transport Project

Sydney Metro is Australia's biggest public transport project.

From the north west, metro rail is being extended under Sydney Harbour, through new underground city stations and beyond to the south west.

In 2024, Sydney will have 31 metro railway stations and a 66km standalone metro railway system, revolutionising the way Australia's biggest city travels.

Chatswood to Sydenham

The Environmental Impact Statement for this project was on display in 2017 and around 560 submissions were received. The Submissions and Preferred Infrastructure Report for the Sydenham to Bankstown Metro Upgrade was on exhibition during July 2018

Project approval was received on 10 January, 2017 with early works now underway.

The first of five tunnel boring machines will be in the ground before the end of 2018 to deliver new 15.5-kilometre twin railway tunnels between the end of Sydney Metro Northwest at Chatswood and Sydenham.

New stations will be delivered at Crows Nest, Victoria Cross, Barangaroo, Martin Place, Pitt Street and Waterloo along with new underground platforms at Central Station.

Sydenham to Bankstown

Sydney Metro received planning approval on 19 December 2018 to upgrade the T3 Bankstown Line between Sydenham and Bankstown to metro standards. In 2024, customers will benefit from a

new fully-air conditioned Sydney Metro train every four minutes in the peak in each direction with lifts, level platforms and platform screen doors for safety, accessibility and increased security.

PROJECT FEATURES

- An air-conditioned metro train every four minutes in the peak
- Fully accessible stations including lifts
- Improved CCTV surveillance, platform screen doors, platforms level with train floors, minimal gaps between platforms and trains
- New or upgraded concourses and new station entries
- Improved station interchange facilities
- All trains stopping at all local stations – no waiting for the right train
- Less time spent waiting due to higher frequency services
- Safe and efficient connections during the peak and non-peak periods between key centres along the T3 Bankstown Line
- Reduced travel times to key employment and education precincts
- New, direct and fast services to Martin Place, Barangaroo, North Sydney, Chatswood and Macquarie Park
- Interchanges to other rail services at Sydenham, Central and Martin Place.

Room for 100,000 extra customers across Sydney

Sydney Metro, together with signalling and infrastructure upgrades across the existing network, will increase the capacity of train services across Sydney from about 120 an hour today, to up to 200 services an hour beyond 2024.

After the conversion, metro trains from Bankstown will run at least every four minutes in the peak, or 15 trains an hour.

UNTANGLING THE CITY LOOP MEANS MORE TRAINS, MORE OFTEN.

section which appears in the policy schedule applies.

Labour Hire Employees

This **endorsement** applies to the Vero Fire Protection Industry Insurance
Product

Disclosure Statement and Policy Wording (prepared on 24 April 2018)
(Your Policy).

The following endorsement applies to the Public and products liability
cover section of Your Policy.

On page 62 of Your Policy insert the following new exclusion under the heading 'What you are not covered for under this policy section' :
This policy section (including the Additional benefits) does not insure You for liability arising directly or indirectly out of or caused by, through, or in connection with, or for:

Labour Hire Employees

Personal injury or property damage arising from or in connection with Labour hire employees. On page 67 of Your Policy insert the following new definition under the heading 'Definitions':

Labour hire employee means:

Any person who is an employee of a labour hire organisation and who is not engaged in the business under a contract of service or apprenticeship, but who has been engaged, hired or contracted by you to perform work under your supervision in connection with the business. This endorsement is made a part of the policy and is subject to all of the terms and conditions thereof. Except to the extent expressly stated, this endorsement does not modify the terms and conditions of the Policy.

Pipe Freezing

This endorsement applies to the 'Public and Products Liability cover section' of your policy. The following exclusion is added under the heading 'What you are not covered for' under this policy section' on page 62 of Your Policy:

Pipe Freezing

This policy section (including the Additional benefits) does not insure You for liability arising directly or indirectly out of or caused by, through, or in connection with, or for:

Pipe freezing or any other technique for work, including repair, to pipe(s) without having to shut off, isolate, or drain water or other liquid from the pipe(s) or pipe system.

In all other respects your policy remains unaltered

Yours faithfully

Australian Government

Department of Education, Employment and Workplace Relations

Our Ref 35112

Mr M Robb
Managing Director
Robb Family Trust
Po Box 1008
KELMSCOTT DC WA 6997

Dear Mr Robb

I refer to your submission of 20 September 2011 in which you request the Department's advice about whether the industrial arrangements, as noted in your request, are compliant with the *National Code of Practice for the Construction Industry* (the Code) and the *Australian Government Implementation Guidelines* (the Guidelines).

The Modern Award that applies to Robb Family Trust has been assessed against the Guidelines and is Code Compliant.

The Building And Construction General On-Site Award 2010

I consider the Award to be compliant with all versions of the Guidelines.

In assessing modern awards under the Guidelines, primacy is given to the section of the Guidelines that requires compliance with, amongst other things, relevant legislation and industrial instruments (section 8.1.1 of the 2006 Guidelines and section 6.1.1 of the 2009 Guidelines).

On this basis, in relation to modern awards, to be considered compliant with the Guidelines parties must comply with their modern award and with any elements of the relevant Guidelines that do not conflict with the award, including in relation to the practical on-site application of these.

Please note this assessment only applies to the awards detailed above. Should the workplace arrangements vary (for example because of new agreements or by the making of any unregistered written agreements) a further assessment will be required.

The Office of the Australian Building and Construction Commissioner monitors behaviour on sites to which the Code and Guidelines apply, and investigates any alleged breaches of them.

You may obtain a copy of the Guidelines from www.deewr.gov.au/building.

For general information regarding the implications of the workplace reforms for your industrial arrangements you can contact the Fair Work Infoline on 13 13 94.

If you have any further questions please feel free to contact the National Code Assessment Hotline on 1300 731 293 or email: building@deewr.gov.au.

Yours sincerely

A handwritten signature in black ink, appearing to read 'Brad Bretland', written in a cursive style.
